Prompts

Video Topics:

Act as a viral YouTube strategist specializing in prehistoric human history and ancient survival content.

Analyze this niche:

- Ancient humans
- Human evolution
- Ice Age survival
- Hunter-gatherers
- Lost prehistoric technologies
- Ancient communication
- Human adaptation
- Weird historical facts

Generate 5 highly viral video ideas.

Requirements:

1. Follow the style of channels that make videos like:

   - How Did Ancient Humans Lose Their Dark Skin?

   - What Did Ancient Humans Use to Hunt Giants?

   - The Craziest Survival Methods Used by Ancient Humans During the Ice Age

2. Each topic must:

   - Trigger strong curiosity

   - Be understandable in under 5 seconds

   - Feel surprising or counterintuitive

   - Have proven viral potential

   - Be suitable for a 8-12 minute YouTube video

3. For each topic provide:

   - Title

   - Virality score out of 10

   - Why people would click

   - Thumbnail text (2-5 words)

   - 3 thumbnail concepts

Prioritize topics involving survival, evolution, danger, extreme environments, strange human behaviors, and lost prehistoric knowledge.

ADDED SECTION — COMPLETED VIDEO EXCLUSIONS

Add this to the end of the original Video Topics prompt.

PREVIOUSLY COMPLETED VIDEOS — DO NOT REPEAT

- How Did Ancient Humans Survive Without Clothes?
- How Did Ancient Humans Survive Without Teeth?
- How Did Ancient Humans Survive Without Clean Drinking Water?

STRICT DUPLICATE-PREVENTION RULES

- Never recommend a completed title again.
- Never suggest the same core topic with slightly different wording.
- Compare all five ideas against the completed list before replying.
- Reject any idea that substantially overlaps with a completed video.
- Prefer a new survival problem, adaptation, or archaeological mystery.
- After completing another video, append its final title to this list.

For future videos: add the title of each newly completed documentary to this list and supply the updated list every time you request new video topics.

ADDED SECTION — THUMBNAIL STYLE

Use this for Google Nano Banana thumbnail creation. Replace the four square-bracket placeholders with your video-specific details.

Create a highly clickable YouTube thumbnail in a bold prehistoric cartoon style. 16:9 widescreen, high-resolution, ultra-clean, polished 2D digital cartoon illustration. The thumbnail should look like a viral educational/history thumbnail with a very simple, bold, easy-to-read composition.

STYLE

Modern animated cartoon thumbnail, thick black outlines, smooth cel shading, rounded characters, expressive faces, simple anatomy, slightly exaggerated emotions, clean vector-like finish, bright vibrant colors, high contrast, minimal clutter, professional YouTube thumbnail quality. Family-friendly, playful, and visually punchy.

LAYOUT

Use a strong split-screen or before-and-after composition. LEFT side shows [LEFT_SCENE]. RIGHT side shows [RIGHT_SCENE]. Put a large bold curved yellow arrow with a thick black outline in the center pointing from left to right. The idea should be instantly understandable in less than one second.

CHARACTER STYLE

Use simple prehistoric humans / cavemen with messy dark brown hair, prominent brow ridge, broad nose, large expressive eyes, rounded heads, and basic brown animal-hide clothing. Characters should be cute, bold, emotional, and highly readable, not realistic. The main subject is [MAIN_CHARACTER].

TEXT STYLE

At the very top, place huge bold uppercase text: "[TITLE_TEXT]". The text must be very large, centered or stretched across the top, in white with very thick black outlines. Make it extremely easy to read on mobile. Keep text short and powerful.

BACKGROUND STYLE

Simple prehistoric environment only. Use rocks, caves, campfire, beige ground, light orange sky, dry land, grass, mountains, or water depending on the topic. Background should support the idea but stay clean and not distracting.

COMPOSITION RULES

- Main character should be large and dominant.
- Facial expression must be strong and obvious.
- Problem on one side, solution or contrast on the other side.
- Keep objects big and readable.
- Do not overfill the thumbnail with details.
- The yellow arrow must be large and visually strong.
- Everything should feel clean, bright, and click-worthy.

QUALITY

Crisp edges, smooth clean coloring, polished cartoon finish, strong readability, high click-through-rate thumbnail design, consistent style for a prehistoric documentary channel.

AVOID

Photorealism, 3D render, realistic humans, muddy composition, tiny details, dark unreadable scenes, extra text, watermarks, modern objects unless absolutely necessary for the concept, messy backgrounds, cinematic realism.

OPTIONAL QUICK FILL-IN TEMPLATE

TITLE: [TITLE_TEXT]

LEFT SIDE: [LEFT_SCENE]

RIGHT SIDE: [RIGHT_SCENE]

MAIN CHARACTER: [MAIN_CHARACTER]

ADDED SECTION — SCRIPT FORMATTING RULE

Append this two-line rule to the original Scripting Prompt. The original Scripting Prompt pages are preserved exactly.

Do not leave blank lines between sentences or paragraphs.

Put each sentence on the next line, with no empty lines in between.

Scripting Prompt:

You are an elite YouTube documentary writer creating scripts for a channel about ancient humans, evolution, prehistory, survival, anthropology, archaeology, and forgotten human history.

Generate the first 500 words, then when i say next then create the next 500 words and so on until entire script is completed

Write a complete YouTube script about:

[VIDEO TOPIC]

The script must feel identical in structure and engagement style to highly viral anthropology channels.

WRITING STYLE:

- Write like a storyteller, not a teacher.
- Never start with definitions.
- Open with a shocking discovery, mystery, archaeological find, strange fact, or scientific puzzle.
- Create immediate curiosity within the first 30 seconds.
- Make viewers feel they NEED the answer.

SCRIPT STRUCTURE:

1. Hook
    - Start with a real event, discovery, fossil, skeleton, artifact, ancient site, or surprising fact.
    - End the opening with a compelling mystery.
2. The Big Question
    - Introduce the central question behind the topic.
    - Make it feel important to human survival or human history.
3. Investigation Phase
    - Reveal information gradually.
    - Each section should answer one question while creating another.
    - Use cause-and-effect storytelling.
4. Escalation
    - Introduce complications.
    - Show why the obvious explanation is incomplete.
    - Add new evidence, discoveries, or scientific findings.
5. Major Twist

    - Include at least one surprising discovery that changes the viewer's understanding.
6. Final Reveal
    - Bring all clues together.
    - Explain the answer clearly.
7. Powerful Ending
    - End with a surprising implication about humanity.

ENGAGEMENT RULES:

- Every 30-60 seconds introduce a new curiosity gap.
- Frequently use transitions like:
    - "But there was a problem."
    - "The evidence didn't fit."
    - "But then scientists discovered something unexpected."
    - "And that's where things get strange."
    - "The answer seemed obvious. It wasn't."
    - "But this created a new mystery."
- Never dump information.
- Explain one concept at a time.
- Turn every fact into a survival consequence.
- Show why each discovery mattered.

NARRATION STYLE:

- Conversational.
- Documentary-like.
- Simple language.
- No academic jargon unless immediately explained.
- No bullet points.
- No section labels in the final script.
- No references or citations.

SPECIAL RULE:

Every major idea must follow this pattern:

Fact
→ Consequence
→ Survival impact
→ New question

Length: 1800-2500 words.

Goal:
The viewer should constantly feel they are uncovering a mystery about ancient humans and

ADDED SECTION — OPENING VISUAL DENSITY

Append this to the original Images Prompts instructions. The original image prompt, style rules, numbering rules and output format are preserved exactly.

OPENING VISUAL DENSITY RULE

- For the first 2 minutes of the documentary, increase visual density significantly to maximize viewer retention and curiosity.
- The first 2 minutes must contain more visuals per minute than the remainder of the video.
- Use faster visual changes during the opening and create more standalone image prompts for the opening section.
- Prioritize hook visuals, mystery visuals, emotional reaction shots, question-based visuals, dramatic reconstructions, close-ups, comparisons, and simple infographic-style explanations.
- Avoid long opening stretches with a single visual. Keep the opening varied and coherent.

DENSITY TARGET

- For a 14-minute video with roughly 160 visuals overall, target 40–50 visuals in the first 2 minutes.
- Use about 110–120 visuals over the remaining 12 minutes. Scale targets proportionally if duration or total visual count differs.
- This is a pacing target, not permission to skip any script sentence or to change the original output format. When one spoken sentence requires multiple visuals, keep its script quotation exact and assign consecutive visual numbers.

OPENING VISUAL STYLE

- Alternate characters, object close-ups, mystery clues, environmental views, reconstructions, diagrams, and scientific explanations.
- Emphasize before/after, problem/solution, danger/survival, and question/answer contrasts.
- Use bold, immediately readable compositions without repetition or unnecessary clutter.

should never feel like they are watching a lesson. They should feel like they are watching an investigation that reveals surprising truths about humanity.

Images Prompts:

You are an expert storyboard artist for a viral YouTube channel about:

- Ancient humans
- Anthropology
- Human evolution
- Archaeology
- Survival
- Ancient history

Your job is NOT to summarize the script.

Your job is to convert the script into image-generation prompts for Google Nano Banana.

STYLE ANALYSIS:

All images must match this exact style:

- Simple educational cartoon
- 2D flat illustration
- Thick black outlines
- Stick-figure inspired humans
- Rounded cartoon characters
- Minimal shading
- Warm color palette
- Light orange sky backgrounds
- Beige ground
- Clean vector appearance
- Educational infographic style
- Kurzgesagt meets simple whiteboard animation
- Consistent character design
- High readability
- No realism
- No photorealism
- No cinematic lighting

- No 3D render
- No text unless specifically requested

IMPORTANT RULES:

1. Generate prompts for ONLY 5 visuals at a time.
2. Number them:

VISUAL 1
VISUAL 2
VISUAL 3
VISUAL 4
VISUAL 5

3. For every visual include:
- Script sentence
- Visual purpose
- Google Nano Banana prompt
4. Every prompt must be self-contained.
5. Every prompt must include the style description.
6. Do NOT skip sentences.
7. If a sentence requires multiple visuals, split it into multiple prompts.
8. If a sentence is abstract, convert it into a visual metaphor.
9. Visuals should alternate between:
- Character scenes
- Environment scenes
- Diagrams
- Infographics
- Historical reconstructions
- Scientific explanations

to keep visual variety high.

10. When I say:

NEXT 5

continue from where you stopped and generate the next 5 visuals.

11. Maintain a running count.

If the first batch ends on Visual 5, the next response begins with:

VISUAL 6

and continues.

OUTPUT FORMAT:

VISUAL #
